CUSTOM TRACKMAN RADAR BOXES

These boxes are custom built to surround and protect the Trackman radar. They are 22 inches tall and 24 inches wide and deep. They are made of solid hardwoods and high density boards. The front is custom designed with a recessed logo and the sides are dimpled to resemble a golf ball. They are painted and sealed with a durable, high quality finish. They will ship unassembled with instructions for easy assembly.

I am currently working on a first come first serve basis. See the 2024 Pricing Guide for more info and submit an inquiry form on my website www.whitewoodcompany.net

SHIPPING

Box(es) are shipped FedEx Ground from TN. Shipping estimate can be provided before initial purchase is made. Final shipping cost invoice must be paid before box(es) are scanned by FedEx. In the event that damage occurred during shipment, all evidence of damage needs to be sent to White Wood Company ASAP. We will work to resolve any issues in a timely manner.

PRODUCTION

After we receive a high resolution image of the logo, a mock up of the logo will be provided before production begins. Logos that have many intricate details may need to be simplified to be able to recess into the front wall. A media kit or brand guide would be ideal to match company colors and fonts. Production time is about 4-6 weeks.

ORDERING

To proceed with ordering, complete the Trackman Radar Box inquiry form on our website (www.whitewoodcompany.com) or send us an email (whitewoodcompany@gmail.com). Invoices are created and sent via email through Quickbooks.
